You can open any page of your liking but I suggest you start with the hompage(Which the landing page of our system.) Starting with the homepage will help you get an overall feel of our system but you can really start with any of the pages

 courses	4/8/2024 8:29 AM	Chrome HTML Docu...	11 KB
 HomePage	4/7/2024 5:16 PM	Chrome HTML Docu...	5 KB
 Login	4/7/2024 5:19 PM	Chrome HTML Docu...	2 KB
 WelcomePage	4/7/2024 5:22 PM	Chrome HTML Docu...	4 KB

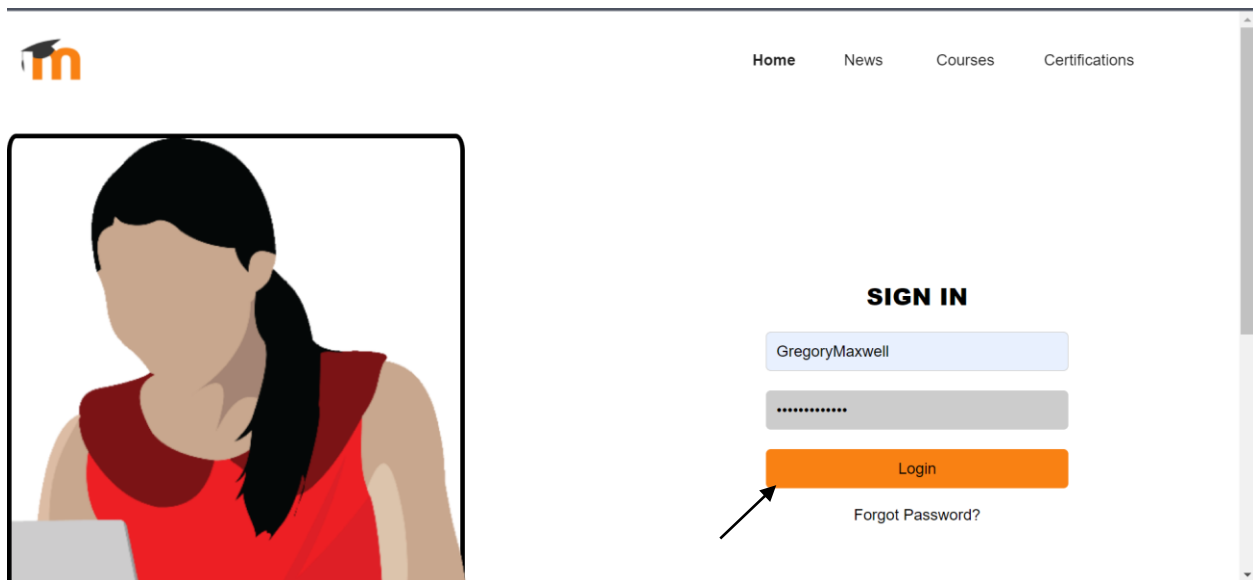

Assuming you start with the HomePage. This is where you would arrive

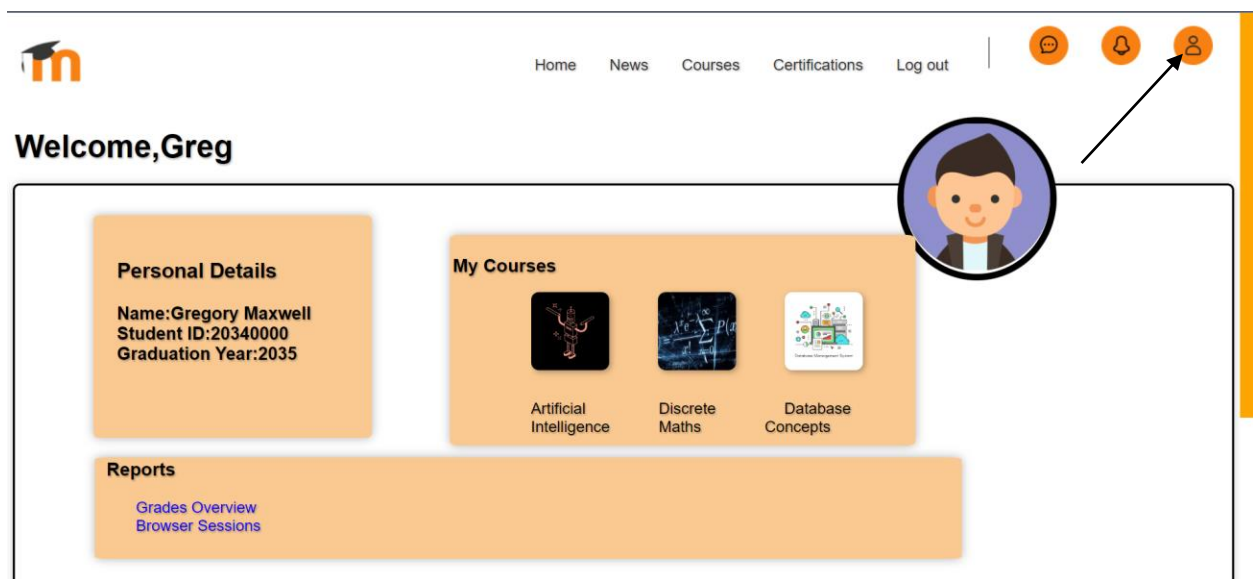

To Login Please Click the Log In button Ontop and you will be redirected to the login page

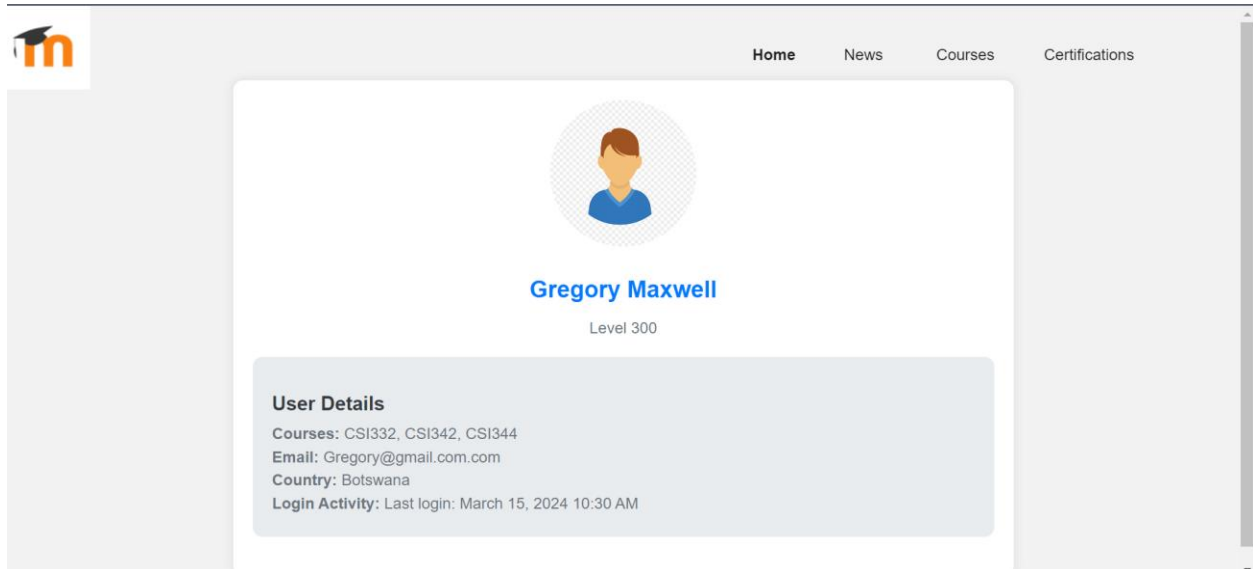

You will then be redirected to the Login Page in which you are required to enter your Details and Log in. For this Example I will Login as GregoryMaxwell.

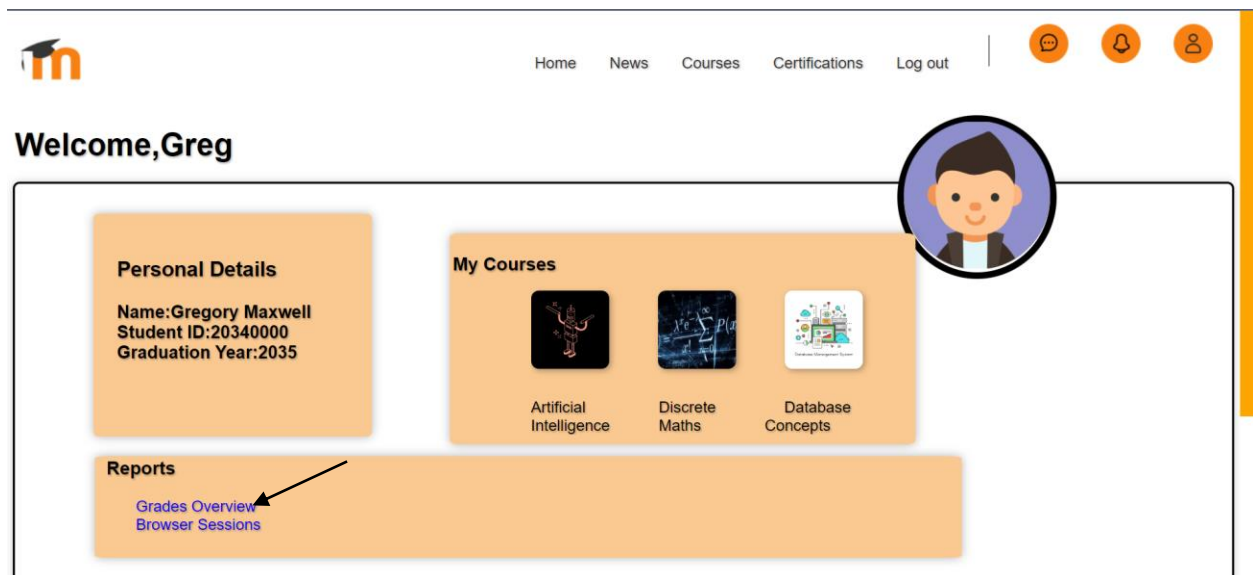

After Clicking login you will be redirected to The user Welcome page.

From Here You can access multiple pages while using the navigation bar. But lets say we want to check the user profile you will click the profile icon on the far right.

From here we can go to the home page , check news , courses, certifications page through using the navigation bar. But I will just go back to the welcome user page so that I can show you some student details that might be overlooked.

From here you can click the Grades overview to check grades or browser session to check your relative browser sessions. But lets start with grades overview.

**Courses I am taking**

Course Name	Grade
<a href="#">CSI323 Algorithms</a>	A
<a href="#">CSI131 Discrete Mathematics</a>	B
<a href="#">CSI262 Database Concepts</a>	B

Now lets check the break down score for our A in Algorithms

**Gregory Maxwell**

**CSI323 Algorithms**

Grade Item	Mark	Total Marks	Feedback
Quiz 1	50	50	You the goat!
Quiz 2	45	50	Great job!
Test 1	41	50	Good job, but need to improve on big Oh calculations.

Seems like we did a great job with Quiz 1. So you can check the grades break down for every course.

Now lets go back to the welcome user page and view the browser sessions.

When you are done checking your personal information you can always use the nav bar to explore the site even further. Lets say you want to go to the homepage for some reason just click home on the nav bar

Now we are in the Homepage.(Mind you, This homepage and the landing page are too different pages. The Homepage.html file is the landing page, you cannot access anything from there without logging into the system.) Now lets check out the news page. To do this just click news on the nav bar and you will be redirected there.
